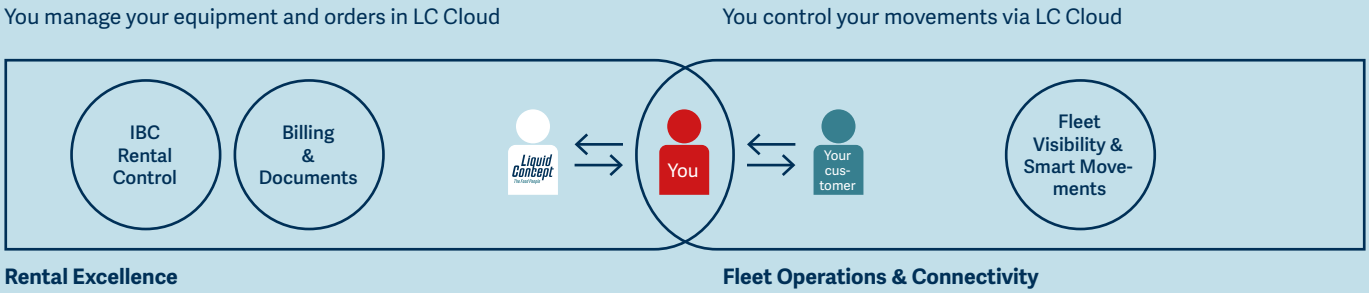
LC Cloud EN

Liquid Concept
The Food People



The future of fleet management: Simple. Digital. Integrated.

Turn your IBC fleet into a genuine competitive advantage. LC Cloud takes your liquid logistics to a new level. Manage your rental containers, control worldwide shipments and keep track of all documents and costs at all times – all in a single, intuitive customer portal.

One platform. Endless possibilities.

LC Cloud seamlessly brings two worlds together: **Rental Excellence** for perfect handling of your rented equipment and documents, and **Fleet Operations and Connectivity** for proactive control of your shipments and integration into your own ERP system.

Conventional IBC and fleet management

- Lots of manual coordination for IBC rental and fleet overview.
- No transparency on container locations, conditions and utilisation.
- Information silos: orders, shipments, invoicing and certificates are handled separately.
- Communication via different channels, no real-time transparency.

Typical consequences: lost time, errors, extra costs and dissatisfied customers.

LC Cloud EN

Your logistics: scalable, secure and transparent.

Smart IBC Rental Control

All rental handling in one place

From order to collection: manage your equipment digitally and transparently.

- **Intuitive IBC Order:** Order your containers directly via the portal and track their status (Order Tracking) in real time until delivery.
- **Fleet Dashboard:** Keep a complete overview of your active fleet, including fill levels, temperatures and rental periods.
- **Service and support:** Report damage conveniently with a click and follow the repair status live.

Compliance and Billing Hub

All documents and costs at your fingertips

Say goodbye to paperwork. LC Cloud is your digital archive for full compliance.

- **Document Box:** All provision documents, inspection reports, certificates and damage reports are linked to the respective IBC and can be accessed at any time.
- **Transparent billing:** Find your invoices neatly archived and use the Billing Assistant for a simple cost breakdown.

Fleet Visibility, API integration

More than just rental software

LC Cloud digitalises not only your rental equipment, but all your transport operations.

- **Seamless system integration:** Use our open APIs to integrate finance and ERP systems (e.g. SAP) directly with the cloud.
- **Analytics and Insights:** Use the consolidated data from your shipments for in-depth analyses and optimise your supply chain.

Technology & security

EU hosting meets ‘mobile first’

You benefit from user-friendly technology with no implementation effort on your side.

100% browser-based: no installation, no manual updates. You simply log in.

Maximum data security: hosting is GDPR-compliant and exclusively on servers in the EU, under the responsibility of Liquid Concept in Hamburg.

Always at hand: thanks to the mobile-first approach, you always get the optimum view on your smartphone, tablet or desktop PC.

The modules at a glance

Rental Excellence

IBC Order

You order your equipment directly in LC Cloud.

Intuitive, simple, traceable at all times and always documented by the system.

Check-in

Once you have rented IBCs in LC Cloud, they are 'checked in' to your inventory.

Docs & Checks

All provision documents are stored in LC Cloud, e.g.:

- Confirmation of receipt
- Generation and handover of IBC numbers
- Documentation of IBC condition

Pickup Notification

When an IBC leaves the depot, you are notified automatically.

Fleet Transparency

You can track the status of equipment rented from Liquid Concept in real time, at any time.

Location, status, rental period (start, planned end). For Smart IBCs also fill level, temperature and more.

Fleet Dashboard

You get an overview of all your equipment and can check the status of every container at any time.

The system can also map IBCs that were **not** rented from Liquid Concept.

IBC Order Tracking

You can track the status of your order in LC Cloud at any time.

Return Confirmation

You receive the return confirmation in LC Cloud – including any cost statements for damage and residual quantities.

Billing & Documents

Freight Requests

Freight requests can be submitted, managed and archived via LC Cloud.

Contract Conditions D

Keep track of your individual terms and current agreements at all times.

Invoices D

Your invoices are available directly in LC Cloud, neatly archived and prepared so that you can access the underlying data.

Parts Catalog D

Our spare parts catalogue with ordering function.

Customer Profile D

Your profile – or, from Liquid Concept's perspective, your customer master data.

Here too: 100% transparency.

Settings include preferred delivery and collection times as well as requirements for references, vehicles and equipment.

Fleet Visibility and Smart Movements

Billing Assistant €

LC Cloud gives you optimum support in invoicing your orders.

We help you calculate potential costs if your consignee exceeds the rental period, and prepare the relevant documents and attachments.

Fleet Management €

Map all your IBC movements in the system yourself – and monitor our IBCs, your own or third-party ones.

Customizing €

Your specific needs **and those of your customers** can be met individually: for example, we can set up tailored *best-before date management* or an *approval process* that matches your requirements exactly.

API & System Integration €

Integrate your finance and/or ERP systems via the LC Cloud interface.

Cost Sharing €

Manage the ancillary costs of your customer deliveries and pass on any damage or residual-quantity costs to whoever caused them.

Analytics & Insights €

The data from your equipment and shipments – if required, also data to and from your customers, with Liquid Concept equipment or your own – is a real treasure trove.

LC Cloud helps you unlock it.
